Property	Rating
1. User Creation and Authentication	5 points - No apparent vulnerability
2. Integrity preservation	5 points - No apparent vulnerability
3. Confidentiality	5 points - No apparent vulnerability
4. Append	4 points - There is no way to determine whom the file belongs to, hence the if-else condition is not valid. However the implementation is efficient.
5. Sharing	5 points - No apparent vulnerability
6. Revocation	5 points - Would have been better if the location of file is also changed. But this is not required by the question
7. Clarity of the document	4 points - Some part of documents are not very clear.
